Penelitian ini dilakukan untuk mengetahui pengaruh model *Snowball Throwing* dikombinasikan dengan media power point pada materi sistem pernapasan manusia di kelas XI IPA SMA AL WASHLIYAH 1 MEDAN Tahun Pembelajaran 2019/2020. Tujuan dalam penelitian ini adalah untuk mengetahui pengaruh model *Snowball Throwing* dikombinasikan dengan media power point terhadap hasil belajar sistem pernapasan manusia siswa Kelas XI IPA SMA AL WASHLIYAH 1 MEDAN.

Nilai rata-rata (\bar{x}) pre-test sebelum diberikan perlakuan adalah 41 dengan simpang baku (S) = 8,48. Nilai rata-rata hasil belajar siswa yang menggunakan model *Snowball Throwing* adalah 82,59 dengan simpangan baku 8,63. Berdasarkan uji hipotesis diperoleh nilai $t_{hitung} > t_{tabel} = 18,97 > 1,55$ sehingga H_0 diterima dan H_a ditolak.

Dari hasil penelitian dapat disimpulkan bahwa ada pengaruh yang signifikan pengaruh model *Snowball Throwing* dikombinasikan dengan media power point terhadap hasil belajar sistem pernapasan manusia siswa Kelas XI IPA SMA AL WASHLIYAH 1 MEDAN Tahun Pembelajaran 2019/2020.

Kata Kunci : Model *Snowball Throwing*, Media Power Point, Hasil Belajar

ABSTRACT

THE EFFECT OF *SNOWBALL THROWING* LEARNING MODEL COMBINED WITH THE POWER POINT MEDIA TOWARD THE STUDENT LEARNING OUTCOMES AT HUMAN RESPIRATORY SYSTEM LEARNING MATERIAL TO THE STUDENTS IN CLASS XI SMA AL WASHLIYAH 1 MEDAN

This study is conducted to find out the effect of *Snowball Throwing* learning model combined with the power point media at human respiratory system learning material in class XI IPA SMA AL WASHLIYAH 1 MEDAN in the academic year 2019/2020. The purpose of this study is to find out the effect of *Snowball Throwing* learning model combined with power point media toward the student learning outcomes at human respiratory system learning material in class XI IPA SMA AL WASHLIYAH 1 MEDAN.

The average value of (\bar{x}) pre-test before being given the treatment was 41 with standard intersection (S) = 8,48. The average value of the student learning outcomes using *Snowball Throwing* learning model was 82,59 with a standard intersection 8,63. Based on the hypothesis testing, it was obtained the value of $t_{count} > t_{table} = 18,97 > 1,55$ so that H_a is accepted and H_o is refused.

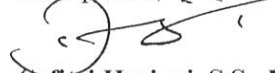

Thus, it can be concluded from the result of the study that there is a significant effect of the *Snowball Throwing* combined with power point media toward the students learning outcomes at human respiratory system learning material in class XI IPA SMA AL WASHLIYAH 1 MEDAN in the academic year 2019/2020.

Keywords : *Snowball Throwing* Model, Power Point Media, Learning Outcomes
