This study aims to determine the Effectiveness Analysis of Restaurant Taxes and Regional Parking Taxes and Their Contribution to Regional Original Income (PAD) (Case Study of the Medan City Tax and Retribution Management Agency) in 2018 - 2021. The type of research used is qualitative in the form of primary and quantitative data. in the form of secondary data. Data collection techniques used in this research are literature study, documentation and interviews. The analytical method used is descriptive quantitative analysis.

The results of this study indicate that the analysis of the effectiveness and contribution of restaurant taxes and parking taxes in 2018 - 2021 has fluctuated or decreased in percentage in several years. However, on average the two taxes are still quite effective. The highest percentage of restaurant tax effectiveness was obtained in 2019 at 102.88% and the lowest in 2021 at 76.92%. Meanwhile, the highest parking tax effectiveness in 2018 is 100.95% and the lowest in 2021 is 48.41%. Then for the highest restaurant tax contribution in 2019 at 14.33% and the lowest in 2020 at 11.69%. Meanwhile, the highest parking tax contribution in 2019 was 1.81% and the lowest in 2021 was 0.96%. Then overall the restaurant tax contribution is still not good in contributing and the parking tax is categorized as very less in contributing to Regional Original Income (PAD).
