

ABSTRAK

Latar Belakang : Aktifitas berorganisasi merupakan kegiatan yang dilakukan mahasiswa diluar kegiatan pendidikan dalam rangka mengembangkan minat, bakat yang dimiliki mahasiswa. Organisasi kemahasiswaan merupakan salah satu media penghubung antara pendidikan dan kehidupan bermasyarakat, tidak dapat dipungkiri banyak sekali manfaat keikutsertaan mahasiswa dalam organisasi kemahasiswaan. Namun, keikutsertaan mahasiswa dalam organisasi kemahasiswaan tersebut dapat menimbulkan dampak negatif terhadap prestasi akademik, apabila mahasiswa tersebut tidak dapat mengatur waktu antara kegiatan akademik dan organisasi.

Tujuan : Mengetahui hubungan keaktifan berorganisasi dengan prestasi akademik mahasiswa FK UISU angkatan 2019.

Metode : Penelitian ini bersifat analitik observasional dengan metode *cross-sectional*, dengan sampel berjumlah 75 orang yang diambil secara *simple random sampling* dan pengambilan data menggunakan kuesioner.

Hasil Penelitian : Berdasarkan hasil penelitian ini, mayoritas aktif berorganisasi sebanyak 68 orang (90,7%), mayoritas memiliki tingkat prestasi akademik baik sebanyak 53 orang (70,7%), dan terdapat hubungan positif yang signifikan antara keaktifan berorganisasi dengan prestasi akademik dengan nilai p value 0,000.

Kesimpulan : Berdasarkan jumlah responden, menunjukkan bahwa terdapat hubungan yang signifikan antara keaktifan berorganisasi dengan prestasi akademik.

Kata Kunci : Keaktifan Berorganisasi, Prestasi Akademik

ABSTRACT

Background : Organizational activities are activities carried out by students outside of educational activities in order to develop the interests and talents of students. Student organizations are one of the media that connects education and social life, it cannot be denied that there are many benefits of student participation in student organizations. However, student participation in the student organization can have a negative impact on academic achievement, if the student is unable to manage the time between academic and organizational activities.

Objective : To determine the relationship between the organizational activity and the academic achievement in students of the Faculty of Medicine, Islamic University of North Sumatra, 2019

Methods : This study was analytic observational with a cross-sectional, with a sample of 75 people taken by simple random sampling and data collection by questionnaire.

Research Results : Based on the results of this study, the majority were active in organizing as many as 68 people (90.7%), the majority had a good level of academic achievement as many as 53 people (70,7%), and there was a significant positive relationship between organizational activity and academic achievement with a p value 0,000.

Conclusion : Based on the number of respondents, it shows that there is a significant relationship between organizational activity and academic achievement.

Keywords : Active organization, Academic achievement
